BATTERY 2030+: a large-scale research initiative

- Inventing the batteries of the future
- Providing breakthrough technologies to the European battery industry
- Enabling long-term European leadership in both existing markets and future emerging applications

3 ambitious objectives:

1. Establish the BATTERY 2030+ roadmap
2. Propose R&I actions
3. Get official stakeholders support for the BATTERY 2030+ roadmap

Endorse BATTERY 2030+

- Receive the news about the initiative
- Be involved in consultation process (written + workshop consultation)
- Support the final BATTERY 2030+ roadmap
